

# Ganbayar Bayanmunkh

IT ENGINEER

## Profile

Dynamic IT Engineer with 5 years of multifaceted experience in software development and educational technology. Expertise in designing innovative IT curricula and implementing hands-on projects, fostering an engaging learning environment. Proven skills in full stack development using Node.js and ReactJS, alongside a strong foundation in cloud solutions with AWS and Docker. Committed to enhancing operational efficiency through automation and technical support, ensuring seamless integration of technology in educational and banking systems. Passionate about mentoring and empowering others in the realm of technology.

## Employment History

### Development automation engineer, Khan bank, Ulaanbaatar

DECEMBER 2024 – PRESENT

Ensures testing environments closely mirror real banking systems, allowing new features and updates to be tested safely before going live. Maintains stability of these environments to minimize disruptions during changes or upgrades. Applies automation tools to reduce manual work, improve accuracy, and accelerate testing. Contributes to the fast and reliable launch of new digital banking services by providing stable and efficient testing environments.
